MONTGOMERY VILLAGE FOUNDATION, INC.
Investment Committee Meeting Agenda
October 15, 2018
****North Creek Community Center****
~7:00 PM

Open Session

Residents Time

1. Chairman's comments
2. Review and approve minutes from 7/16/18 meeting (enclosed)
3. Review investment portfolio (enclosed)
4. Adjournment

**MINUTES OF MEETING
MONTGOMERY VILLAGE FOUNDATION
Investment Committee
July 16, 2018**

A regular meeting of the Montgomery Village Foundation Investment Committee was held at 7:00 p.m. on Tuesday, July 16, 2018 at the MVF Administration Office, 10120 Apple Ridge Road, Montgomery Village, Maryland.

Members Present:

Glenn Gargan, President
Peter Webb, Vice President
Bob Carey, Treasurer
Jeff McCloskey

Members Absent

Others Present:

David Humpton, Executive Vice President
Daniel Salazar, Chief Financial Officer
Josh Stump, Wilmington Trust (via telephone)
Joanna Swatik, Wilmington Trust (via telephone)
Jennifer Thornett, Recording Secretary

Residents' Time

There were no residents present.

1. Chairman's comments

Mr. Gargan called the meeting to order at 7:01 p.m.

2. Review and approve minutes from January 16, 2018 and April 16, 2018 meetings

Mr. Carey moved approval of the April 16, 2018 meeting minutes as amended. The motion was seconded and passed (3-0-1); Mr. Webb abstained.

Mr. Webb moved approval of the January 16, 2018 meeting minutes as presented. The motion was seconded and passed (3-0-1); Mr. Webb abstained.

3. Review investment portfolio

Ms. Swatik reviewed the objectives of the portfolio. She noted the Board approved an increase in the equity target to 40%, which will be done gradually and opportunistically. Ms. Swatik reported the portfolio is overweight in fixed income and noted it will adjust as they work toward the target allocation for equities. Mr. Stump added the actual portfolio positioning has not changed from the prior year as shown by the detailed asset category allocations.

Mr. Stump reported the total portfolio net of fees trails the benchmark. He noted if the benchmark were weighted according to how the portfolio is weighted the numbers would be closer. Mr. Stump explained a dividend-based strategy has greater downside protection, but in a particularly strong markets it tends to trail.

Mr. Stump reviewed the cash flow history and noted the net investment change for the portfolio is \$575,975.

In response to a question from the Committee, Mr. Stump noted the discipline of sticking to the investment strategy is what makes it successful over time. He indicated there is a lot happening on the geopolitical front and noted the next set of tariffs, if they go into effect, will be more meaningful and have an impact on global GDP and the market overall. Mr. Stump added the conservative nature of the portfolio protects it from significant draw downs in the market, which presents an opportunity to get closer to the equity target.

Mr. Humpton asked if there were any trades this past quarter. Ms. Swatik agreed to email the summary of trades for the Committee to review.

Mr. McCloskey asked for a summary of liquidity events at the next meeting. Ms. Swatik noted bonds will be set to mature in late October/early November.

4. Adjournment

Mr. Webb moved to adjourn the meeting at 7:25 p.m. The motion was seconded and passed unanimously.

There being no further business, the meeting was adjourned at 7:25 p.m. The reports, authorizations, and other documents presented at the meeting have been initialed and attached hereto or filed in the offices of the Montgomery Village Foundation.

Investment Policy Statement

Prepared For

WTNA AGT MONTGOMERY VLG FNDN INC

Investment Policy Statement

Effective Date: February 26, 2018

Investment Strategy: Income and Growth

Investment Objectives

The primary objective is to preserve capital on a real return basis after inflation with a secondary objective of a moderate growth of capital. Another objective of the portfolio is to maintain liquidity of the assets for cash flow needs. The strategy will consist primarily of fixed income securities, but will also include equity, inflation hedges and cash. Fixed income investments include taxable and/or tax-exempt instruments. Equity investments will be diversified by market capitalization, investment style, and include both domestic and international holdings. Inflation hedges consist of commodities, real estate and inflation-linked bonds.

Suitability

This strategy is appropriate for investors with an intermediate time horizon who seek income and preservation of capital.

Risk Profile

This strategy seeks to achieve its objective with a modest level of volatility. Other risks including purchasing power risk are inherent in this strategy. Broad asset class diversification may reduce risk and/or enhance returns.

Investment Policy Statement

Effective Date: February 26, 2018

Asset Classes	Benchmark	Minimum	Target	Maximum
Equity	Equity Blend (60% Russell 3000 / 40% ACWI Ex US IMI)	20%	40%	45%
Fixed Income	Barclays Intermediate Govt/Credit Bond Index	50%	54%	80%
Inflation Hedges	Inflation Hedge Blend (50% Barclays TIPS / 35% FTSE NAREIT / 15% Bloomberg Comm Index)	0%	4%	10%
Cash & Cash Equivalents	Merrill Lynch 90-Day Treasury Bills Index	0%	2%	10%

103377-610	AGT MONTGOMERY VLF FNDN

Investment Restrictions

There are no investment restrictions on this portfolio. Wilmington Trust has full discretion regarding the investments in the portfolio.

Client Considerations

This is a foundation. For investment management purposes, the portfolio consists of three (3) sub-accounts: Dash account -001 holds a diversified mix of mutual funds and ETFs. Dash account -000 holds individual equities managed in accordance with Wilmington Trust's EDIS strategy. Dash -610 holds taxable bonds managed in accordance with Wilmington Trust's Total Return fixed income strategy. The account is managed on a total return basis.

This investment policy has been modified to reflect the ranges and benchmarks chosen for all sub-asset classes by the Montgomery Village Foundation Investment Committee.

Income Considerations

There is no specific income target for this portfolio.

Investment Policy Statement

Effective Date: February 26, 2018

Tax Considerations

The portfolio is a 501c4 and therefore has no tax concerns. Taxable fixed income will be used for the allocation to core bonds.

Liquidity Requirements

Liquidity requirements are low as this is the foundation's reserve fund. No distributions are anticipated at this time.

Legal Constraints

There are no legal constraints that would place restrictions on the investment management of this portfolio.

Conversion Plan

As of September 2017, the MVF Board approved an increase in the equity target to 40%, which will be done gradually and opportunistically, and the equity range as been adjusted as well. Once additional equities are purchased in the portfolio, the IPS target will be adjusted.

Supplemental Report Disclosure

General

These reports and the information contained herein are provided as a supplement and are intended for information purposes only. They are not a replacement or substitute for your custodial account statements. You are encouraged to carefully review custodial statements and retain them for your records as they may contain notices, disclosures and other important information. Due to differences in production, these reports may vary in some details, including pricing. Please report promptly any material inaccuracy or discrepancy in this information to your Relationship Team. If revised data becomes available to Wilmington Trust after these reports are generated, we may update our records accordingly; however, revised data typically will not result in the generation of a new report. The **investment values and estimated income** information reported herein may be generated using market quotations, closing price, mean bid or ask, or estimated market value obtained from various quotation services or issuers which we believe to be reliable and which were available when the report was prepared. If an investment did not have a readily determinable value, then reported values are based on the last valuation available to us at the time the report was generated. For **assets not custodied** at Wilmington Trust, prices and values are provided by an independent third party, such as the issuer or their administrator, and Wilmington Trust is not responsible for this information, nor can Wilmington Trust guarantee its accuracy or timeliness. **Investment Values may not equal market value or fair value** and may include accruals. **Asset values will fluctuate.** This report should not be used to prepare tax documents. Information for tax reporting purposes will be reflected in your annual Wilmington Trust Tax Information Letter.

Illustrations of recommended portfolio changes may be included in some reports and noted as **With Proposed Trades** or **Includes Regular Holdings and Proposed Trades**. Such illustrations may include estimates of proceeds from sales, or purchases based on those proceeds. These estimates are provided for illustrative purposes only, do not reflect actual activity in your account, are based on the same historical pricing used throughout this report, and are not assurances or guarantees of trading or investment results. Trade confirmations should serve as the primary record for the execution of a trade.

Investment products are not insured by the FDIC or any other governmental agency, are not deposits of or other obligations of or guaranteed by Wilmington Trust, M&T, or any other bank or entity, and are subject to risks, including a possible loss of the principal amount invested.

Certain characterizations, such as market capitalization and equity "style", are based on information provided by third parties. Charts and other graphics also may be supplied by a third party. This content is provided for illustrative purposes only. Negative numbers are not displayed in some of the graphics.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.

Performance is provided gross of fees unless identified as Net. Gross returns reflect the deduction of transaction costs and internal fees and expenses, such as a mutual fund's internal expenses, but do not reflect the deduction of advisory fees or other account expenses. Investor returns are reduced by such fees and any other expenses incurred in the management of an account and have a compounded impact over time. Similarly, the returns shown would be lower if the results reflected the deduction of advisory fees. Net performance reflects the deduction of advisory fees. Performance results are specific to investments in your account and will vary, sometimes materially, from other accounts depending upon the performance of individual investments as well as any restrictions, the timing of rebalancing, actual expenses and fees, and other factors. Closed accounts are not listed, but may be included in historical market values and rates of return. Performance calculations assume dividends and other earnings remain in the account until otherwise reinvested or distributed. Returns are time-weighted and calculated monthly. Returns for periods greater than one year are annualized. **Certain holdings may be excluded from calculations or may be treated separately:** PRIVATE EQUITY FUND returns are excluded from the calculation of equity returns; SEGREGATED ASSETS are considered separately for performance calculations, but may not be categorized as Segregated on all reports - results are included in the Total Market Value and Grand Total Returns, but are excluded from the Total Managed Return; OTHER ASSETS are not defined in our standard asset categories, but they are included in all performance calculations.

Key Terms

All data is provided for informational purposes only, as a supplement to custodial account statements, and may contain estimates. Below are key terms used in this report:

• **CONTRIBUTIONS/WITHDRAWALS:** The net of all funds received into or disbursed from the portfolio. Contributions include the addition of cash, receipt of assets, tax refunds, and loan repayments. Withdrawals include cash distributions, delivery of assets, tax payments, and fees paid to Wilmington Trust.

• **CREDIT QUALITY RATINGS:** Credit ratings are used to evaluate the likelihood of default by a bond issuer. Independent rating agencies, such as Moody's Investors Service, analyze the financial strength of each bond's issuer. Moody's ratings range from Aaa (highest quality) to C (lowest quality). Bonds rated Baa3 and better are considered "Investment Grade". Bonds rated Ba1 and below are "Speculative Grade" (also "High Yield"). Average Credit Rating reflects a portfolio-weighted average of ratings on individual rated bonds - non-rated bonds are excluded - it does not represent a rating of the portfolio as a whole. The weighted average is intended only as an aggregate illustration of the portfolio holdings rather than as an indication of their respective risks, as certain risks -including the risk of default of individual issues- may be underrepresented by this measure.

• **EFFECTIVE DURATION:** Duration is a measure of a bond's sensitivity to changes in interest rates and is calculated as the average percentage change in a bond's value under parallel shifts of the yield curve. Thus a bond with duration of 4 would be expected to lose 1% in value (price) in the event of a 25 basis point (0.25%) increase in market rates, represented by the yield curve. Conversely, that bond would be expected to appreciate 1% in value with a 25 basis point decrease in market rates.

• **ESTIMATED ANNUAL INCOME (Est. Inc.):** Estimated Annual Income is an indication of income return expected from security positions over the next 12 months assuming that the position quantities, interest /dividend rates, and prices remain constant. For U.S. government, corporate, and municipal bonds it is calculated by multiplying the coupon rate by the face value of the security. For common stocks, ADRs, REITs and mutual funds it is calculated using an indicated (projected) annual dividend. They are provided for illustrative purposes only, are not a forecast or guarantee of future results, and they should not be relied on for making investment, trading, or tax decisions.

• **ESTIMATED PORTFOLIO YIELD:** Estimated portfolio yield is an estimate of aggregate yield based on indicated dividend and/or coupon yields divided by the portfolio market value as of the date indicated. Yield estimates are provided for illustrative purposes only and are not an assurance or guarantee of future results. Yield is one component of total return, and is inherently positive - income from dividends and interest may be wholly or partially offset by negative price changes for a given security, resulting in a capital loss.

• **EXPENSE RATIO (Exp. Ratio):** The expense ratio reported for a mutual fund reflects the proportion of the expenses incurred within the fund to the total assets of the fund. The internal expenses include, but are not limited to, fees paid to the fund's adviser(s), fund trading costs, and expenses incurred in the administration of the fund. Expense ratio is reported Net, reflecting current fee and expense waivers in place with the fund's service providers. Were those waivers not reflected, or were they to expire, the expense ratio would be higher.

• **INCOME RECEIVED*:** The total of interest and dividends received from investments.

• **NET INVESTMENT CHANGE:** The increase or decrease in market value of the portfolio less Wilmington Trust fees. This figure excludes contributions and withdrawals.

• **REALIZED GAIN/LOSS*:** Realized gain/loss is the difference between the sales proceeds of a security and the adjusted cost basis of that security. If sales proceeds are greater than the original cost, that position reports as a realized gain. Conversely, if the sales proceeds are less than the original cost, the position reports a realized loss. This is a preliminary estimate, is reliant upon accurate cost basis information, and may not reflect all cost basis adjustments. Corporate actions and income reclassifications will alter a holding's basis and subsequent gain/loss values. If no cost basis is reported or if you believe you have more accurate cost information for your holdings, please contact your Relationship Team. This document should not be used for tax reporting.

• **STANDARD DEVIATION:** The volatility, or uncertainty, of future returns is a key concept of investment risk. Standard deviation is a measure of volatility and represents the variability of individual returns around the mean, or average annual, return. A higher standard deviation indicates more return volatility. This measure serves as a collective, quantitative estimate of risks present in an asset class or investment. Some risks may be underrepresented by this measure.

·**UNREALIZED GAIN/LOSS:** Unrealized gain/loss is the difference between the most recent market value available for a security and the adjusted cost basis of that security. If the market value is greater than the original cost, that position has an unrealized gain. Conversely, if the market value is less than the original cost, that position has an unrealized loss. This is a preliminary estimate, is reliant upon accurate cost basis information, and may not reflect all cost basis adjustments. Corporate actions and income reclassifications will alter a holding's basis and subsequent gain/loss values. If no cost basis is reported or if you believe you have more accurate cost information for your holdings, please contact your Relationship Team. This document should not be used for tax reporting.

*This report should not be used to prepare tax documents. Information for tax reporting purposes will be reflected in your annual Wilmington Trust Tax Information Letter.

Benchmarks

There are a variety of market indices or blended indices that may appear as benchmarks for comparison purposes. Returns relative to index results may not be reflective of a portfolio's ability to achieve your financial goals. There may be differences between the indices included in this report and the indices in your Investment Policy Statement or the benchmarks used for the specific strategies in which the portfolio is invested. Benchmark indices may be changed from time to time, by Wilmington Trust as a firm or by your Relationship Team as individual circumstances evolve, and such changes may be applied retroactively or on a going-forward basis. For additional information please contact your Relationship Team.

·**POLICY BENCHMARK:** The composition of the Policy Benchmark as of the date of this report is footnoted on the Investment Summary report. The Policy Benchmarks is determined by the weights and indices selected in your Investment Policy Statement. Any historical changes will not be reflected in the current period footnote. Policy Benchmarks may also be presented by asset class: Equity, Fixed Income, Inflation Hedges, and Hedge Strategies.

·**BROAD BENCHMARK:** An index or blended benchmark of market indices selected by your Relationship Team. The allocations may change over time if a change is made to the investment strategy. Changes made to this benchmark by your Relationship Team may be applied retroactively or on a going-forward basis. For additional information please contact your Relationship Team.

·**ALLOCATION BENCHMARK:** The Allocation Benchmark is a blended return of broad market indices assigned by asset class based on the portfolio's allocation at the beginning of each month. Weightings to illiquid or privately held assets may be excluded from the calculation. The market indices that may be used in this benchmark are Standard & Poor's 500 Index, Russell Midcap Index, Russell 2000 Index, MSCI ACWI ex-US IMI, MSCI ACWI IMI, Barclays Capital Aggregate Index, S&P Municipal Bond Intermediate Index, Barclays Capital World Government ILB Index (Hedged), S&P Developed Property Index, Bloomberg Commodity Index, HFRX Absolute Return Index, HFRX Global Hedge Fund Index, and Lipper Money Market Funds Index.

·**BLENDED EQUITY BENCHMARK:** The Blended Equity Benchmark is a blended return of broad equity indices assigned by equity asset class based on the portfolio's allocation at the beginning of each month - essentially an equity subset of the Allocation Benchmark. Weightings to illiquid or privately held assets may be excluded from the calculation. The market indices that may be used in this benchmark are Standard & Poor's 500 Index, Russell Midcap™ Index, Russell 2000® Index, MSCI ACWI ex-US Net, and MSCI ACWI IMI.
